CSc Practical Test

A'S

Paper 2

Topic: Built in functions(Linear Searching)

Task:

Write a program which will take an input from the user and search it in a built in array using the linear search algorithm.

For Example:

BuiltInArray = [Apple, Orange, Grape, Strawberry, Blueberry, Mango]

UserInput = Mango
Output: The input found and the index number is 5

UserInput = Rice
Ouput: Input is not available in the array

Solution:

Duke Sir
